Description

Description:

After choosing the German language from the dropdown list located in the "Admin → Configuration -> Localization" menu section not all texts on the website changed from English into German language.

Steps for reproduction:

1. User is on the login page of Orange HRM <https://opensource-demo.orangehrmlive.com/>
2. User enters Admin's login "Admin" into "Login" field
3. User enters Admin's password "admin123" into "Password" field
4. User clicks on the "Login" button
5. User chooses "Configuration" options from Admin's menu
6. User chooses "Localization" option from the dropdown list
7. User chooses "Edit" button
8. User chooses German language from the dropdown list
9. User clicks on the "Save" button

Expected result:

Application's language changes into German. All texts are in German.

Actual result:

Not all texts are in German.
